

# What do the contradictory corona measures conceal

**In dealing with the Corona crisis and the resulting measures, our political leaders keep contradicting each other. Also, there are only individual experts who speak up. Is this really about protecting the health of citizens or are there other motives behind it?**

From the time the Covid-19 infections started appearing, politicians and experts are constantly contradicting themselves.

With regard to face masks, the medical advisor to the German government, Christian Drosten, stated in January 2020 that the virus could not be stopped by these masks. Still in February, also Lars Schaade, the Vice President of the Robert Koch Institute, rejected the practice of wearing masks in everyday life because they were unnecessary.

Nevertheless, end of April face masks were mandated nationwide for shopping and on public transport, although by this time infection rates had already dropped.

The World Health Organization initially had criticized masks: If used improperly, they could even become dangerous.

Recently, however, it revoked its statements on the use of face masks and now also advises to wear masks.

There are similar contradictions with regard to the reproduction rate – that is the indicator for the incidence of infections – and contradictions in the various restrictive measures in the individual federal states of Germany - and world-wide.

Accompanying these contradictions and illogical measures, an unprecedented, massive censorship can be observed on YouTube and other platforms.

Videos with critical expert voices on the purpose and background of the corona scenario, on the billions in pharmaceutical profits from coronavirus vaccines – despite the health risks – as well as videos on the connection between 5G radiation and the severity of coronavirus illness, are simply deleted.

Should important information be suppressed here? Information which shows that all these supposed "security measures" are obviously not at all about the security and health of the world population!

An unknown author sums up the general unease of the population as follows:

“Not until the last hairdressing salon and the last small business is bankrupt, not until the last student has lost his future, and the last kindergarten kid is scared of approaching others, when we have all forgotten what a smile looks like, will we realize that Corona is not our biggest problem in the world.”
