

## Iran – The USA sets course for war

**On 1 October, Iran attacked Israel with at least 180 missiles. As the situation has become more and more tense since then, the danger of an all-out war in the Middle East is greater than it has been for years. Outwardly, efforts are being made to prevent a further escalation of the conflict. But appearances are deceptive – obviously the course is set for war!**

In retaliation for the killing of Hamas leader Ismail Haniyya and Hezbollah leader, Hassan Nasrallah, Iran attacked Israel with at least 180 missiles on October 1, 2024. With Israel now threatening to retaliate, the danger of an all-out war in the Middle-East is greater than it has been for years. Apparently, international efforts have been taken forth to prevent a further escalation of the conflict, but appearances are deceptive! As early as October 5, 2024, the head of CENTCOM [United States Central Command], General Michael Kurilla, landed in Israel to intervene in Israel's military preparations in response to the missile attack by Iran. According to the former member of the US House of Representatives, Ron Paul, this has already set the course for war on the part of the US government. He writes:

“Over the weekend (October 5-6, 2024), the Commander of the US Central Command (CENTCOM), General Michael Kurilla, arrived in Israel to “coordinate” with the Israeli military and plan a military strike against Iran. Think about that for a moment: one of the highest-ranking officers in the US military is planning a war in a foreign country against another foreign country which will be fueled by American weapons, American intelligence, and American tax dollars. Did that foreign country – Iran – attack the United States or threaten Americans? No, it did not. What did Iran do to warrant a CENTCOM commander bringing the weight of the US military into play to plan a war – possibly WWII?”

This is strongly reminiscent of the events before the start of the Gaza war a year ago. On October 16th, 2023, US General Michael Kurilla also visited Israel to coordinate with its military leadership. On the night of October 27th-28th 2023, Israel launched its ground offensive on the Gaza Strip.

After almost three years of a brutal and pointless proxy war by the US against Russia in Ukraine, a war against Iran now seems to possibly be the US administration's next strike. This could trigger a conflagration in the Middle East and initiate a third world war. But who wants such a war, in which only losers will remain? The renowned U.S. financial and geopolitical analyst Martin Armstrong made clear assessments in 2022 at the start of the Ukraine war. To answer this question, his message may now be more relevant than ever. See an excerpt from the Kla.TV program: Financial analyst Martin Armstrong: "The West needs World War III!" [[www.kla.tv/22640](http://www.kla.tv/22640)]

The true reason for the war in Ukraine and the confrontation with Russia is said to be the catastrophic state of the global financial and economic system. Similarly, a war is now needed to set the “Great Reset” in motion, as proclaimed by the World Economic Forum WEF.

In an interview lasting just under an hour, Armstrong spoke, among other things, about the fact that since the World War II, governments have incurred new debts every year and, according to experts, it is no longer possible to ever repay this colossal debt. The background to this is that global government debt has now grown to an alarming 71.6 trillion US dollars (of which around 30 trillion dollars is US government debt alone) and continues to rise steadily. The central banks, which have driven the world into this gigantic over-indebtedness with their loose monetary policy, are now almost incapable of acting, as they have exhausted all their options for exerting influence. In addition, their monetary policy has fueled inflation without really being able to stimulate the economy. This means that the monetary policy of central banks and governments has failed!

The corona measures and now the Russia sanctions have also massively disrupted and damaged global supply chains, which means there is a risk that the global economy will sink into chaos. For Armstrong, this is mismanagement by governments at a global level. ...

Armstrong additionally stated that the Biden administration had deliberately destroyed the global economy. His wording: "Everything you can imagine, that they are doing to Russia is to save themselves. [...] This is all deliberate. There is no return to normal here. They want Russia to do something. [...] Unfortunately, we are headed for war."

These alarming statements by Martin Armstrong coincide with those of financial expert Ernst Wolff. In a recent interview, he also adequately explained that both the coronavirus and Ukraine crises were distraction-maneuvers. He says, the real reason is that the economy has been deliberately and intentionally destroyed in order to generate gigantic profits for a few super-rich people and to establish unprecedented centralized rule.

Now, a good two years later, this situation has not improved in any way. Global government debt is expected to rise to 100 trillion dollars by the end of 2024, an increase of almost 40% in this short period of time. The former economic model of Germany has plunged into recession, while billions of dollars and euros continue to be pumped into the war in Ukraine and the armament industry generates gigantic profits at the taxpayer's expense. In the US, in addition to this, a banking collapse of historic proportions is looming, which is even being deliberately brought about by the Fed. [[www.kla.tv/30628](http://www.kla.tv/30628)] This means that the global mismanagement which Armstrong spoke of at the time has increased dramatically and is increasingly coming to light.

In this context, a war against Iran may now possibly be the next chess move by the global masterminds. But this must be countered! In conclusion, listen to Ron Paul's warning words, which also apply to all European States.

"This war will make us less free, less safe and much poorer. There will be no benefits at all, only downside. Will the Biden/Harris Administration greenlight, Israel taking out Iran's oil production and other energy facilities? ... Consider the cost of shipping and trucking and every aspect of our lives that depends on world energy prices. It would be an economic calamity ... We are sleepwalking into a catastrophic war, lulled into compliance by non-stop media propaganda. More billions will be drained from our economy and many more innocent lives will be lost in this madness. Almost a quarter of a century later, we still have not learned the lessons of 9/11. When we go abroad wreaking havoc and destruction on foreign

populations who have not harmed us, we create enemies who will seek revenge. We harm ourselves, and we risk blowback. The time to oppose this impending war is NOW!"

from hag.
