Good evening, Ladies and Gentlemen. Welcome to Klagemauer.tv. Our topic for the day: George Soros: Advocate for a World Dictatorship. Since 1989 the billionaire and financial speculator George Soros has been making increasingly frequent international appearances. He is advocating the abolition of the sovereignty of the national states and therewith clearly pushes the centrally guided world order. His plans, amongst others, include the legalization of drugs, the cancellation of the international fight against drugs, as well as the legalization of direct active euthanasia. The foundations founded and financed by him, according to his own statements have the purpose to "promote the transformation of society according to his will". Thus Soros is currently funding all endeavours worldwide to legalize drugs (for example the intensified advertisement for the permission of cannabis as a pain killer). In order to generally repeal the prohibition of drugs, the Soros Foundations argue that the legalization of drugs would serve an "open society". Especially to legalise hashish, Soros said, the best way to reach this goal would be by propagating medically positive effects. George Soros thereby admits which goals he is advocating. For a society made labile by drugs will not resist a central world order!
